# **Business Continuity & Disaster Recovery Planning (BCP & DRP)**

As the information technology (IT) has presented throughout the operation of the organizations, there is a dire need of devising a “Roll Back” and “Step Forward” plan organization tend to formulate an appropriate business continuity and disaster recovery in order to

- Conduct the continuity of operations planning (COOP).
- Design & implement “Business Resumption Procedures” (BRP).

CGS has an appropriate mix of business professionals having specific exposures with reference to the continuity of business procedures and I.T. professionals providing accelerated ways of protecting business operations “Confidential Information”.

Our BCP & DRP professionals may impart their knowledge and skills through their approach of assessing the impacts of losses on the business factors causing the risk of loss and the measures to protect them.

As the primary object of the BRP & DRP is the description of how an organization has to deal with potential natural and human induced disasters. CGS aids the organization to identify the mission critical functionalities and resume them to the earliest possible time.
